

Plantation at New Campus of Regional Centre Patna on 5th June 2018 World Environment Day

With your kind approval, support and cooperation, the Regional Centre of IGNOU at Patna organized a Tree Plantation Programme from 8.00 am onwards today (05.06.2018) on the occasion of the **World Environment Day** in its New Campus in Mithapur. Prof. Bijay K. Srivastav, Former Director, Computer Division at IGNOU, New Delhi graced the occasion as the Chief Guest and inaugurated the programme by planting a sapling. All the members of RC Staff, almost all the Coordinators/PICs from the local study centres and more than 100 students participated in this noble initiative. All the sides of the building have been covered in this programme and more than 200 saplings of both fruit-bearing and non-fruit-bearing plants were planted by the participants with all energy and enthusiasm. All the Study Centres, particularly the Study Centres-0516P, 05138 and 05147P generously donated plants for this programme to make it a great success. It is expected that by the time we get shifted to the new campus, the saplings will have grown into small trees and would make it look green. Certificates of Appreciation have been given to all the students who participated in the programme for contribution to this noble cause.
